Management mechanisms and development strategies of economic entities in conditions of institutional transformations of the global environment: collective monograph / edited by M. Bezpartochnyi, in 2 Vol. / ISMA University. – Riga: “Landmark” SIA, 2019. – Vol. 1. – 344 p.

The authors of the book have come to the conclusion that it is necessary to effectively use modern management mechanisms and development strategies of economic entities in order to increase the efficiency of their activities. Basic research focuses on diagnostics threat of bankruptcy, assessment of bioenergy potential, intellectual property, efficiency of corporate governance, use of information support, ensuring competitiveness of banking institutions, functioning of the tax system and its decentralization, assessment of the investment climate and investment risks, functioning of a small business. The research results have been implemented in the different models of cluster structures, mechanisms for monitoring the quality of health care, predicting the convergence of economic development, innovative development models, and development strategies of economic entities in various sectors of the economy in the context of euro integration. The results of the study can be used in decision-making at the level of international business, ministries and departments that regulate the processes development of economic systems, ensuring stability and efficiency. The results can also be used by students and young scientists in modern concepts of the development of economic entities in the context of institutional transformations of the global environment.
